Nationally recognised, locally connected

Our lawyers are nationally recognised as leaders in their field; always striving to deliver the most commercial, client-focused solutions across key areas of expertise.

Property

Property is both dynamic and a long game. Developers, investors and businesses rely on timely, commercial advice that balances opportunity and risk. We enable confident decision-making and efficient projects that lead to positive outcomes on all types of commercial property projects.

Planning and environment

In the complex and highly regulated area of planning and environment law, shifting regulatory requirements, navigating approvals and poor advice can bring even the most well thought-out projects to a standstill. Our team works across the spectrum of planning and environment matters to unlock project value and timelines to achieve successful outcomes.

Dispute resolution

Disputes are highly disruptive and can pose serious risks to your business if not properly managed. We keep you on the front foot by identifying the commercial drivers behind disputes so we can resolve issues quickly with outcomes that keep your best interests firmly in the frame.

Corporate

Structuring deals and positioning for growth without the right advice can slow momentum and expose you to unnecessary risk. Our corporate team brings clarity and strategy to guide every decision across all stages of your business lifecycle so when opportunities arise, you can move with confidence.

Employment

Workplaces are evolving rapidly and knowing where you stand on everything from workplace health and safety to privacy and data security is getting harder to manage. We help you manage risk, meet your obligations and keep your people performing at their best with advice that supports safe, positive and high-performing workplaces.

Franchising and brands

The rapidly evolving franchising industry is a complex environment for business owners on all sides of the franchise market. We help you unlock opportunities and stay compliant with practical solutions that deliver clarity, continuity and certainty for franchise businesses.

RedeMont

Estates and succession

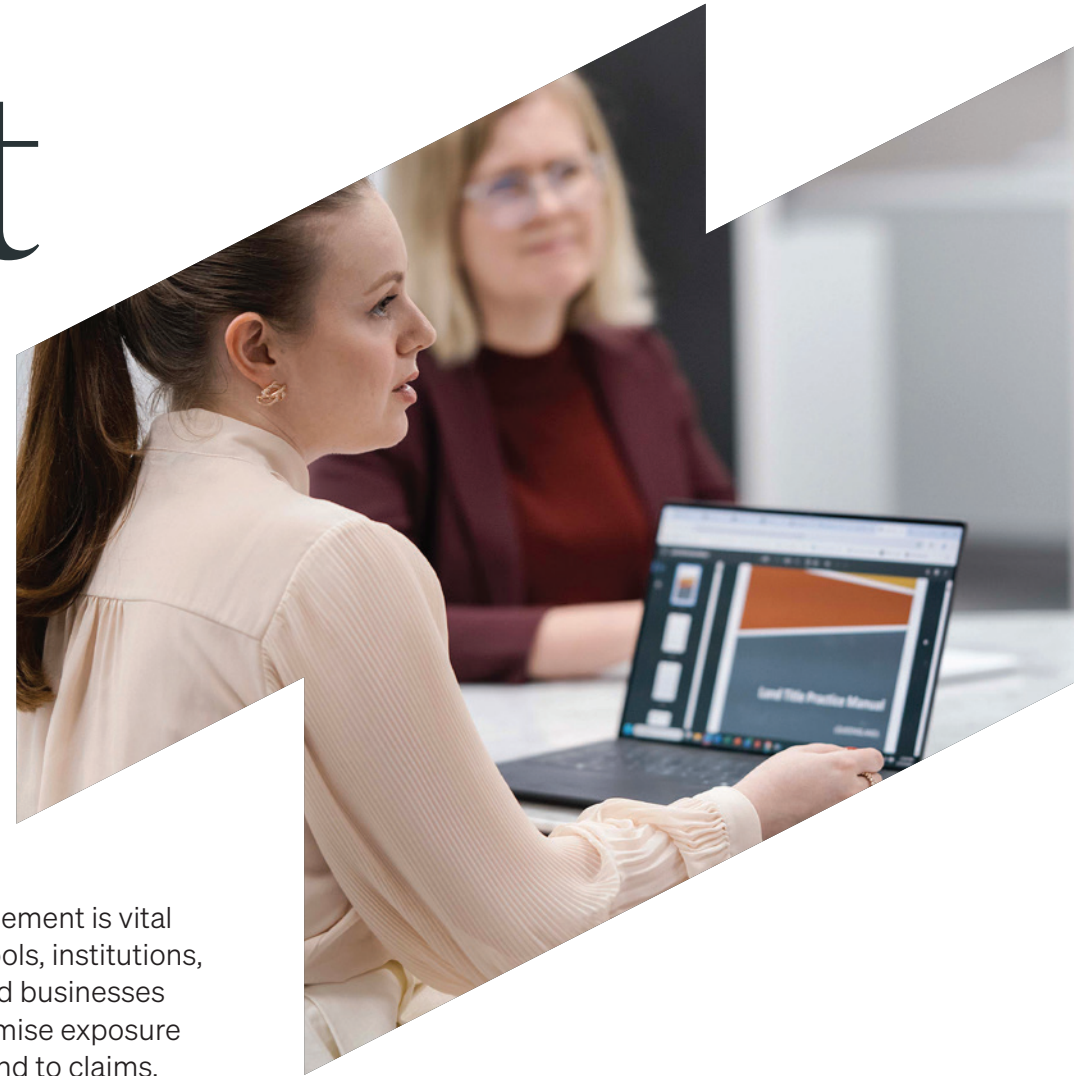

Many of life's most complex challenges require proactive steps to protect your family, assets and legacy. We bring clarity to difficult situations through tailored advice that aims to resolve issues sensitively and minimise conflict, giving you confidence, security and peace of mind for the future.

Regulatory

Public sector entities are subject to intense scrutiny, with increasing commercial, competition and value-for-money expectations adding more pressures. Our Regulatory team has 40 years' experience supporting local government and other public sector teams to deliver efficient, consistent and robust decision making. We also help businesses to navigate regulatory environments.

Insurance and risk

Insurance and risk management is vital across all industries. Schools, institutions, governments, insurers and businesses rely on our advice to minimise exposure to risk and expertly respond to claims. Our team provides clear advice and strategies to manage and resolve claims, and tailored guidance on all aspects of insurance, including indemnity disputes, investigations and reporting, and risk analysis.

'What makes RedeMont stand out is how seamlessly they work as part of our team. Whether it's property transactions, litigation or construction support, their integration into our processes adds real value.'
